## DUAL SHADES REINVENTED

Experience innovative design by independently controlling **two shades, with one chain**

**ROLLEASE  
ACMEDA**  
PRECISION IN MOTION

# ADVANCED ENGINEERED DESIGN

This functional system has reinvented dual shades to be a stylish, sophisticated system that seamlessly integrates into any setting. It's time to forget what you know about dual shades. **The only one of its kind.**

## **UNIQUE DUAL CASSETTE** 103mm x 135mm (4.06" x 5.31")

The contemporary aluminum cassette neatly houses two shades, concealing components and maintaining a neat over-all look. The cassette is completed with color-matched covers and slimline mounting clips for a seamless finish and minimal light gap. 'Anti-rattle' design features provide quiet operation for a pleasant user experience.

## **AUTO-RISE**

Aero™ is a ground-breaking roller shade series that boasts an 'Auto-rise' feature with built-in decelerator, self-rising with a light pull of the hem bar or chain in one system (or hem bar only for Chain free configuration). The shades will automatically stop at your pre-set desired position. The Chain system allows for weight bar override for control at any time.

## **ONE CHAIN TWO SHADES**

Innovative design provides a minimal look requiring only one chain for the system. Thanks to the intricately designed mechanisms you can independently control two shades with one chain to lower or raise either shade.

- Life Cycle tested to ensure product longevity. Qualified through strict internal design process.
- Universal boosters for either left or right-handed controls for reduced inventory.
- Built-in decelerator for a smooth and controlled ascent.
- Top and bottom limit setting for simplified installation and refined user experience. Easily set limits with the press of a button.
- Simple maintenance of tension settings.

## SPECIFICATIONS

### AERO™ DUAL CONFIGURATIONS, CAPACITY & DIMENSIONS

AERO™ DUAL | CHAIN

AERO™ DUAL | CHAIN FREE

### AERO™ SINGLE SHADE CONFIGURATION

AERO™ SINGLE | CHAIN

AERO™ SINGLE | CHAIN FREE

### COLOR RANGE

Aero™ Single adopts all the functional features of the Dual; auto-rise, chain or weight bar control, and a smooth built-in decelerator. This single shade can be enhanced with our sleek CF90 cassette, a stylish single shade cassette to match the dual shade cassette, bringing consistency across the range.
